Organized by **Korea Maritime Institutes, Korea Ports and Harbors Association,  
Korea Port Engineering Corporation, Chungwoon Univ.,  
Hye-In E&C and Kunil Engineering**

## LETTER OF INVITATION

November, 2015

To whom it may concern

On behalf of the Ministry of Oceans and Fisheries of Korea, I am greatly honored and pleased to cordially invite you to the ‘International Symposium for Diversification of Port Development Cooperation Project’ to be held in Seoul (Seoul Marina, Yeouido) on 18-19 November, 2015.

The Far East and Eurasian regions are ushering in a new era in marine transportation and logistics, with notable developments like the launch of the AIIB; China’s One Belt, One Road initiative; and Korea’s Eurasia Initiative. This progress marks an important milestone for the regions in leading the changes in the global shipping and logistics, thereby serving as a new engine for growth. Along with these changes, ever-growing demands for port infrastructure development in developing countries will provide yet another new opportunity for the relevant industries.

In this context, the Symposium will serve as a forum to take stock on the current state of play and strategies in marine transportation and logistics of various countries in this changing landscape, and to chart a path forward for the shipping and logistics industries, exploring challenges and opportunities for new growth, including diversification of port development.

In this regard, I sincerely look forward that you will take the time despite your busy schedule and allow us the privilege to have your presence at this significant event, thereby the Symposium can benefit from your valuable input and insight, and participants can pool their collective wisdom together and open up a new horizon for continued development and growth of the marine transportation and logistics industries.

With Kindest Regards,

KIM Young-suk

Minister

Ministry of Oceans and Fisheries

The Republic of Korea
